

Addimat Waiter Lock RS232

- Waiter lock for fast and easy user identification
- High security with non-manipulable key codes
- Extremely easy operation with magnetic contact – no wear and maintenance-free
- RS232 interface and optional USB version
- Keys available in various colours

The reader is particularly compact and available in black or white to match a modern cash desk environment. The stylish and highly compact housing integrates perfectly into the appearance of a restaurant cash desk. The supplied adhesive Velcro strips allow your customers to place the waiter lock nearly anywhere, including keyboard, monitor and bar table, while its maximum cable length of up to 2 metres offers the required flexibility. The Velcro strips prevent the lock from slipping out of place and waiters can identify themselves in the wink of an eye. The matching waiter keys are available in ten trendy colours.

The popular Addimat waiter lock is known for fast, easy and secure user identification for any POS system. The magnetic key locks into position and submit its identification number, which is unique and cannot be manipulated. With their ergonomic shape, these water-resistant, indestructible keys withstand even the harshest day in the life of a waiter.

The Addimat waiter lock supports both polling and non-polling modes: Using the polling mode, the system requests the ID automatically while the non-polling mode reads the key when it is inserted. This allows quick adjustments to existing software solutions, so that they work with the Addimat waiter lock. Every key is equipped with a worldwide unique 48-bit serial ID, so every key is clearly distinguishable. The user simply moves the key close to the reader and the magnetic contact locks it into position. That is not only easy, but also saves time.

With a standard RS232 interface, connecting the Addimat waiter lock is made easy. Various optional cable lengths (2 and 0.5 m) are available as well. Additional power supply is not required.

Specifications	Item number
• Waiter lock, RS232, 0.5m, black	idt211
• Waiter lock, RS232, 2.9m, white	idt204
• Waiter lock, RS232, 2.0m, black	idt203

Addimat Waiter Lock USB

- Waiter lock for fast and easy user identification
- High security with non-manipulable key codes
- Extremely easy operation with magnetic contact – no wear and maintenance-free
- RS232 interface and optional USB version
- Keys available in various colours

In order to answer various customer demands professionally and to allow a wider range of applications, the Addimat waiter key is also available as USB version. This version is equipped with an integrated switch and connects to the USB 2.0 port of your customers' POS system. Data transmission is possible over keyboard wedge or COM port and can be chosen by the user. Adjustment is extremely easy with the switch on the bottom side of the housing. Software adjustments are not required, and the reader integrates into existing applications individually.

A cable length of 0.5 m or 1.4 m offers many placement options for this reader as well.

Specifications	Item number
• Waiter lock, USB, KBW, 0.5m, black	add50usw
• Waiter lock, USB, KBW, 1.4m, black	add140usw
• Waiter lock, USB, COM, 0.5m, black	add50comsw
• Waiter lock, USB, COM, 1.4m, black	add140comsw

Addimat built-in key reader

- Built-in key reader for fast and easy user identification
- Installation in industry and logistics applications
- High security with non-manipulable key codes
- Extremely easy operation with magnetic contact – no wear and maintenance-free

Identification is not only important in restaurants – even in industrial and logistics environments clear personnel assignment can be decisive. Storekeepers are required to login at the central system and machinists at their machines, even in IT businesses clear identification of administrators is making a striking difference.

The built-in Addimat key readers meet exactly these criteria. Among different variants and cable lengths, you always find the right device for your customers' applications. In addition to variants with open cables for seamless direct connections, we also offer build-in models with 2-pin sockets or USB 2.0 interface.

The compact reader comes – like the cased model – with a black front cover and fits stylishly into any machine or cabinet. The conic design and its strong magnet guarantee that the key locks in position quickly. Users simply have to hold it near the reader and it locks in automatically.

Specifications	Item number
• Build-in key reader, open ended, 0.1m	idt210
• Build-in key reader, USB, 0.9m	add140usw2
• More cable lengths and interfaces	on demand

Addimat Magnetic Key

- Magnetic keys for Addimat waiter locks and key readers
- High security with non-manipulable key codes
- Extremely easy operation with magnetic contact – no wear and tear
- Keys available in various colours
- Optional individual serial number

Following the trend in powerful colours, Addimat waiter locks match perfectly with Colormetrics cash register systems. The colour concept of this high-performance gastronomy touch system is an eye catcher in classy environments that convinces not only users and caterers, but more importantly customers. Whether trendy yellow, orange, green, red, elegant silver or anthracite, the uniform combination of colourful keys for professional waiter locks with a high-end complete system will enthuse everyone.

The popular Addimat key reader is known for fast, simple and secure user identification for any POS system. The magnetic key locks into position and submits its ID automatically. Every key is equipped with a worldwide unique 48-bit ID code that cannot be manipulated and guarantees clear personnel identification. Unauthorised access with other keys is not possible while a smooth process flow is guaranteed.

The water-resistant and nearly indestructible keys survive even the harshest treatment in restaurants, catering or industry. They come in ergonomic key shapes that are easy to use and remain unnoticed in a stressful working or production environment.

With different colours, they go along with any trend and meet individual customer demands. Order them in single colours or in sets with ten different colours. This way, every waiter can use his own favourite colour. If there is a large number of users, as is often the case in hotels or logistics, you can order the keys with an optional, unique identification number on the key. This also makes it easier to identify the right key when handing it over to an employee.

Specifications	Item number
• Magnetic key green	idt609
• Magnetic key yellow	idt610
• Magnetic key blue	idt613
• Magnetic key red	idt614
• Magnetic key set with 10 different colours	idtset
• More colours	on demand
