IntelliSkin® and GDS® Vehicle Docks for Zebra EM45

FEATURES & BENEFITS

Fast & Convenient Charging

By upgrading to the GDS®/IntelliSkin® system, your devices will charge up to 30% faster when paired with compatible docks and chargers. The pogo pad/pin design allows for an easy workflow without fumbling with cords—simply dock the IntelliSkin®-wrapped device to charge.

Reliable Connection, Rugged Protection

Each IntelliSkin® is uniquely built to protect the device using soft, shock absorbing rubber with an internal USB-C connector that protects the device and its ports while converting the connection point to flat pogo pad docking contacts that are easy to clean. Added access to a USB-C port allows connection to the device when not using a GDS® Dock™.

Accessory-Ready

Built-in attachment point on the back of the IntelliSkin®, compatible with the included belt clip or optional upgrades like the GDS® Belt Clip Lever and GDS® Hand Straps.

Easy to Clean

In dirty, rough environments, interrupted device connection is unavoidable. This is mainly due to lack of cleaning maintenance and excessive debris buildup. The pogo pad contacts on the bottom of the IntelliSkin® are intentionally flat to reduce the debris buildup, making it easy to clean.
