## FEATURES & BENEFITS

### Fast & Convenient Charging

By upgrading to the GDS®/IntelliSkin® system, your devices will charge up to 30% faster when paired with compatible chargers. The pogo pad/pin design allows for an easy workflow without fumbling with cords — simply dock the IntelliSkin®-wrapped device to charge.

### Heated Pogo Pins

Heating elements provide the necessary heat required to prevent pogo pins from locking up, allowing them to operate in wet and freezing environments such as cold storage warehousing.

### Reliable Connection, Rugged Protection

Each IntelliSkin® is uniquely built to protect the device using soft, shock-absorbing rubber with an internal USB-C connector that protects the device and its ports while converting the connection point to flat pogo pad docking contacts that are easy to clean.

### Modular Mounting & Accessory-Ready

Utilizing the 2-hole mounting pattern on the back of the dock unlocks hundreds of mounting components to customize your mount to your needs and environment. Additional dock space is provided to accommodate extended battery packs as well as the OEM hand strap accessory.
